50X1-HUM

1. The hydroelectric power station on the Volkov River east of Leningrad and south of Lake Ladoga was completed in March 1941. its capacity at that time as being around 100 thousand kw. 50X1-HUM 50X1-HUM
2. the Volkov dam was originally constructed of concrete in 1926. At that time it had a height of 18 meters, but this was subsequently found to be too low and later two or three meters were added. This addition was constructed of timber. originally the Volkov dam was constructed to supply power for the aluminum industry in Leningrad. The following is a rough sketch of the dam.
